
need any new options on your profile?

Posted by sstark - 2007/01/01 23:44

Does anyone want more options added to their profiles? And if so, what options would those be?

I am talking about things like "marital status", "Ideal first date" and "about yourself"

How come it doesn't let me edit my zodiac sign and chinese sign?

It would be nice if the looking for friends, looking for love, etc. were checkboxes instead so that more than one can be chosen.

It would also be nice if there were profile sections for likes, dislikes, music, etc.

Another amazing feature would be if I could add in a page layout, a music video, etc. like what myspace lets me do.

Also, I'm not sure if it's already on there but each profile should say when their last login was.
